

Index 1966

Index to editorial articles appearing in Iron Age Metalworking International during 1966

Automation

Advanced Computer System Controls Czech Steel Plant, Dec p 46
Automatic Assembly Methods Accommodate Small Components, Nov p 32
Automated Thread Rolling, Sept p 28
Automated Tube Processing, Mar p 29
Automatic Line Machines, Welds and Assemblies, July p 22
Computers Control Tube Rolling, Oct p 28
Dual Approach for N/C, July p 25
Economy From Tape Control, May p 33
Electron Beam Welding Solves Production Problem, Oct p 38
Hydraulic Cylinders Automate Production Jobs, Oct p 36
Low-Grade Ores Processed Using On-Stream Analysis, Sept p 36
Magnetic Handling Pulls Parts Through Mechanised Lines, July p 28
Manipulator Automates Roll Forging, Mar p 28
Numerically Controlled Table Automates Thin-Film Production, Sept p 32
Pneumatics Take Control of Logic, Sept p 24
Production Line Inspection, Sept p 19
Sequence Control, Jan p 37
Testing: A Look Beyond the Product, Oct p 25

Brazing

Brazing Stainless Alloys Offers Many Cost-Reducing Advantages, Feb p 16
Electroslag Welding: Where is it Headed? June p 21

Castings

Ceramic Molding, Nov p 39
Copper Cast in Billets or Slabs, May p 46
Ferrous Die Casting On the Way, Oct p 40
New Cryogenic Cast Iron, Apr p 21
X-Ray Motion Pictures Look Into Castings, Nov p 34

Fabricating

Adhesives Widen Design Scope, May p 32
Corrugated Cargo Tanks, Dec p 51
Rolling Mill Makes Huge Rings, June p 29
Transition Joints: The Road to Bimetallic Design, Feb p 20

Forging

Automated Thread Rolling, Sept p 28
Forging Press and Manipulator Features One-Man Operation, May p 34
Manipulator Automates Roll Forging, Mar p 28

Forming

Explosives' Dual-Purpose Action: Shaping and Strengthening, July p 16
High Energy Rate Forming, Mar p 38
Pickling Plant Crane, July p 17
Roll Forming Replaces Drawing, Apr p 24

Heat Treating

Arc-Heated Ladle Refines and Degasses Steel, Feb p 18
Friction Hardening Gives Superhard Steels, Nov p 28
Heat Treating: Getting the Best of Carbon Steels, July p 13
Heat at the Right Spot Straightens Deformed Shafts, Dec p 42
Nitriding Penetrates Deeper After Titanium Diffusion, June p 32
Novel Crankshaft Repair, Nov p 29
Quenching With an Electric Assist, Feb p 24
Submerged Hardening for Gears, Mar p 39
Vacuum Furnace Cleans Parts, Feb p 31
Vacuum Heat Treating: A Boon for the Common Metals, Nov p 25

Inspection

Faster Steel Analysis, Sept p 35
High Precision Polishing, June p 27
Inclusion Counter, July p 21
Infrared Reveals Defects, Jan p 41
Low-Grade Ores Processed Using On-Stream Analysis, Sept p 36
New Dimensions in the Science of Measurement, May p 27
Non Destructive Testing for Spot Welds, Apr p 28
Numerically Controlled Table Automates Thin-Film Production, Sept p 32
Production Line Inspection, Sept p 19
Sonics Detect Tensile Strength, June p 38
Testing: A Look Beyond the Product, Oct p 25
X-Ray Motion Pictures Look into Castings, Nov p 34

Joining

Adhesives Widen Design Scope, May p 32
Structural Adhesives Bond Metal Glass and Rubber, Oct. p 34

Lubrication

Centralised Coolant Filter, Oct p 39
Efficiency Test for Lubricants, Feb p 28

Machining

Air Floats Heavy Loads for Precision Positioning, June p 26
Automatic Line Machines, Welds and Assemblies, July p 22
Automatic Tool Correction, Feb p 29
Automatic Torquing, May p 31
Band Saw Contouring, Oct p 43
Bar Automatics Speed Small Component Production, Jan p 42
Broadnose Tool Cuts Tungsten, Apr p 18
Centerless Bar Turning Machine Contours Slender Parts Quickly, Mar p 26
Centralised Coolant Filter, Oct p 39
Combined ECM/EDM Technique, Sept p 25
Combined Electro-Erosion and N/C Reduces Die Costs, Jan p 40
Cutting Fluids: Their Effect on Machining Costs, Sept p 30
Deburring Units Cut Cost, June p 37
Dual Approach for N/C, July p 25
Economy From Tape Control, May p 33
Electrolytic Grinder Boosts Carbide Tool Applications, Oct p 42
Flexible Machine Eases Setup, July p 26
Floor Space and Machinery, Feb p 25
Front-Operated Lathes Speed Multiple Machining, Mar p 36
Gearwheel Machining, June p 28
High-Speed Grinding Halves Machining Time, Oct p 32

Hobbing Line Reduces Downtime, Nov p 42
Improved ECM System, May p 44
Improved Reamer Reduces Machine Time, Nov p 36
Laser Speeds Die Making, Apr p 25
Machine Tools: 1966, Dec p 54
Machine Tool Users Disclose Buying Plans, Features Desired, Dec p 39
Machining Line Features Extensive Linking, June p 30
Machining of Tough Materials Demands Anti-Vibration Tools, Nov p 38
Magnesium Machines Faster, May p 39
Milling Fine Tooth Slots, Nov p 31
Multi-Cut Lathe Machines Castings Economically, Apr p 27
Multi-Spindle Index Heads, June p 33
New Machine Tools Offer Higher Productivity and Better Value, Dec p 33
New Snagging Wheel Speeds Slab Grinding, July p 27
N/C for Roll Turning, Feb p 23
Numerically Controlled Table Automates Thin-Film Production, Sept p 32
Precision Grinding Steel Balls, Apr p 22
Precision Powder Tools Set New Trend in Machining, July p 20
Savings From Batch Production, Oct p 35
Scissor-Action Tools, Oct p 31
Sequence Control, Jan p 37
Short Run Continuous Broaching, May p 36
Small Shops Can Profit from N/C, Mar p 31
Turret-Type Copying Lathe Replaces Three Machines, Sept p 27
Vee-Jaws Transfer Giant Axles, Feb p 30
Vibration Analysis, Jan p 36

Management

Floor Space and Machinery, Feb p 25
Fluid Waste Pollution Control, Mar p 30
Value Analysis Technique: Easy to Use, Apr p 30

Materials

Improved Rubber-Like Plastics, July p 30
Laminar Composites: For Design Without Compromise, Apr p 13
New Cryogenic Cast Iron, Apr p 21
New Zinc Alloy Extrusions, June p 34
The Fascination of Fibers, Feb p 13

Materials Handling

Advanced Handling Methods Speed Bearing Production, Mar p 34
Air Floats Heavy Loads for Precision Positioning, June p 26
Automatic Line Machines, Welds and Assemblies, July p 22
Combination Trolley/Hoist, Sept p 29
Conveyor/Hopper, Jan p 39
Die-Handler Trucks: Profit for the Pressworks, July p 24
Lift Truck Replacement Formula: Analysis and Good Judgement, Feb p 26
Machining Line Features Extensive Linking, June p 30
Magnetic Handling Pulls Parts Through Mechanised Lines, July p 28
Miniature Transfer Line, June p 35
Pickling Plant Crane, July p 17
Vee-Jaws Transfer Giant Axles, Feb p 30

Metal Finishing

Automated Tube Processing, Mar p 29
Coating by the Electron Beam, Nov p 30
Continuous Reduction Speeds Tube Line, Apr p 20

Copper Plated onto Aluminium, Nov p 37
High Precision Polishing, June p 27
Laminar Composites: For Design Without Compromise, Apr p 13
New Perspectives for Copper-Coated Steel, June p 24
Pickling Plant Crane, July p 17
Shaping Vapours Into New Materials, Mar p 21
Sound Waves Remove Burrs, Apr p 23
Steelmaker Urges More Care In Specifying Surface Finish, Apr p 26
Wire Coating System, Sept p 31

Plastics

Faster Moulding of Parts, Mar p 37
Improved Rubber-Like Plastics, July p 30
Pellet Dies Last Longer, Oct p 41
Plastic Overcomes Rust, Nov p 35

Pollution Control

Dust Collection: The Critical Fight Against Air Pollution, Jan p 34
Fluid Waste Pollution Control, Mar p 30

Powder Metallurgy

Precision Powder Tools Set New Trend in Machining, July p 20

Power Transmission

Pneumatics Take Control of Logic, Sept p 24

Pressworking

Built-to-Match Press Feed, Dec p 47
Deep-Draw Press Forms Domes in One Step, May p 40
Die-Handler Trucks: Profit for the Pressworks, July p 24
Electro-Hydraulic Machine Forms Difficult Parts, July p 19
Fine Blanking Replaces Six Stamping Operations, Dec p 50
Giant Among Presses, Sept p 33
High-Production Press Line, Feb p 22
Hydraulic Cylinder Automate Production Jobs, Oct p 36
Miniature Transfer Line, June p 35
Shortcut for Blanking Dies, June p 36

Steelmaking

Advanced Computer System Controls Czech Steel Plant, Dec p 46
Arc-Heated Ladle Refines and Degasses Steel, Feb p 18
Automated Tube Processing, Mar p 29
Automatic Alloying and Degassing Boosts Electric Steel Quality, Apr p 16
BOF is Continuously Controlled, June p 39
Computers Control Tube Rolling, Oct p 28
Degassing for any Furnace, Mar p 27
Direct Casting: A Time for Decision, Jan p 31
Direct Reduction Process Employs Shaft Furnace, May p 38
Dust Collection: The Fight Against Air Pollution, Jan p 34
Efficiency Test for Lubricants, Feb p 28
Electric Furnaces: A Trend Toward Volume Steels, Jan p 30
Faster Steel Analysis, Sept p 35
Heat Treating: Getting the Best of Carbon Steels, July p 13
High Speed Mill at Contrecoeur, Sept p 22
Inclusion Counter, July p 21
Iron Ore: Its New Effect on World Steel-making, Jan p 26

Low-Grade Ore Gains Value In Three-in-One Pellet, Sept p 26
 Low-Grade Ores Processed Using On-Stream Analysis, Sept p 36
 Mill Speeds Rod Finishing, July p 31
 New Krupp/Platzter Strip Mill: A Boon to Small Plants, May p 42
 New Perspectives for Copper-Coated Steel, June p 24
 New Plant Employs Multiple Diffusion Processes, May p 30
 New Snagging Wheel Speeds Slab Grinding, July p 27
 Nitriding Penetrates Deeper After Titanium Diffusion, June p 32
 N/C for Roll Turning, Feb p 23
 Oxygen Rides in Argon Bubbles for Degassing of Steel, Dec p 48
 Production Line Inspection, Sept p 19
 Refractories: Smaller Quantities and Better Quality, Jan p 33
 Sponge Iron Pellets Feed Electric and Blast Furnaces, Mar p 32
 Steelmaker Urges More Care in Specifying Surface Finish, Apr p 26
 Stronger Welded Tubes, July p 29
 The Blast Furnace: Charging Less—Making More, Jan p 28
 Trends in Continuous Casting, Nov p 40
 Vacuum Degassing Holds the Heat, July p 18

Testing

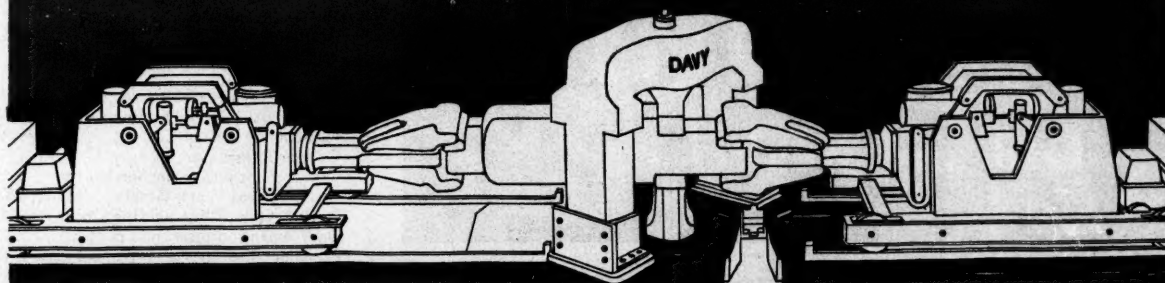

Faster Corrosion Test, Nov p 41
 A Look Beyond the Product, Oct p 25

Welding

Automatic Line Machines, Welds and Assembles, July p 22
 Bimetal Tubes Welded in Volume, Oct p 30
 Brazing Stainless Alloys Offers Many Advantages, Feb p 16
 Continuous Reduction Speeds Tube Line, Apr p 20
 Electron Beam Welding Solves Production Problem, Oct p 38
 Electroslag Process Competes With Vacuum Remelting, Mar p 24
 Electroslag Welding: Where is it Headed? June p 21
 Giant Flash Welding Machine, Jan p 38
 Laminar Composites: For Design Without Compromise, Apr p 13
 Non Destructive Testing for Spot Welds, Apr p 28
 Porosity in Aluminum Welds: Its Causes and Its Cures, Sept p 34
 Pre-Treatment of Welds, Apr p 19
 Pulsed Power Welding, Aug p 35
 Stronger Welded Tubes, July p 29
 Transition Joints: The Road to Bimetallic Design, Feb p 20
 Vacuum Furnace Welds Tubes, May p 37

INTEGRATED FORGING —complete 'package' from Davy-United

The press and hot-chamber die casting machine is controlled by a single operator in a control room, giving a rapid, efficient and accurate production of forged and cast parts.
